

Fabrication

Durham Liftings' manufacturing facility located in the North East of England has a dedicated team of qualified tradespeople to fabricate quality assured products to the highest specifications.

Durham Lifting provide a complete lifting engineering service - from concept to completion. All of our products are designed and built to the highest standards and conform with all relevant regulations and design standards.

Durham Lifting is an engineering, manufacturing and testing company with advanced capabilities in fabricating metal products.

We manufacture and/or fabricate steel structures, large or small to your specifications, or can work with you to create a custom designed solution tailored to your specific application. Your needs and goals drive every step of the process.

Our fabricators and our welders are coded to B.S EN 287-1 and B.S. EN ISO 9606-1, ensuring excellent welding quality, tight material controls and fast, efficient turn around times.

IN-HOUSE FABRICATION:

- Metal Fabrication and Welding
- Machining
- Non destructive testing (NDT)
- Testing (2000 Tonne Test Bed - the largest of its kind in the UK)

ON-SITE FABRICATION:

Whether on your premises or at a location away from the project, our team of qualified tradespeople can fabricate and assemble parts or systems at a location of your choice.

We work to your schedule, at a time you choose, minimising disruption to your production schedule.

For further information contact us today!
