

## Motion Software

Motion is the next generation of inspection and compliance software. With the latest technology, new functionality and its intuitive design, the platform offers total control of an organisation's inspection compliance process.

### Motion Overview

Durham Lifting are committed to offering our clients a full 'all round' service, and therefore are happy to inform you that Motion, the next generation of inspection and compliance software is now fully functional within our organisation.

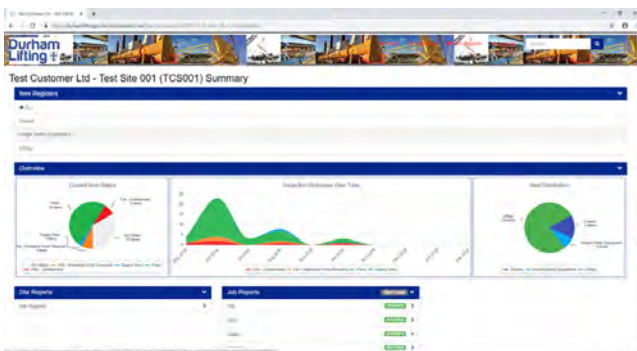

With the latest technology, new functionality and its intuitive design, the platform offers total control of your organisation's inspection compliance process. The system allows you, our client 24 hour access to the online portal to view, download and organise all equipment examination records, and certification is accessible within hours of the examination being completed.

There is also a facility to view ongoing examinations to ensure that you are always working with fully up to date, efficient and integrated records.

*Please see an example of the quality of information the system generates (below), plus information of our Motion implementation charge (right).*
