

Looking for a solution to your lifting and handling needs?

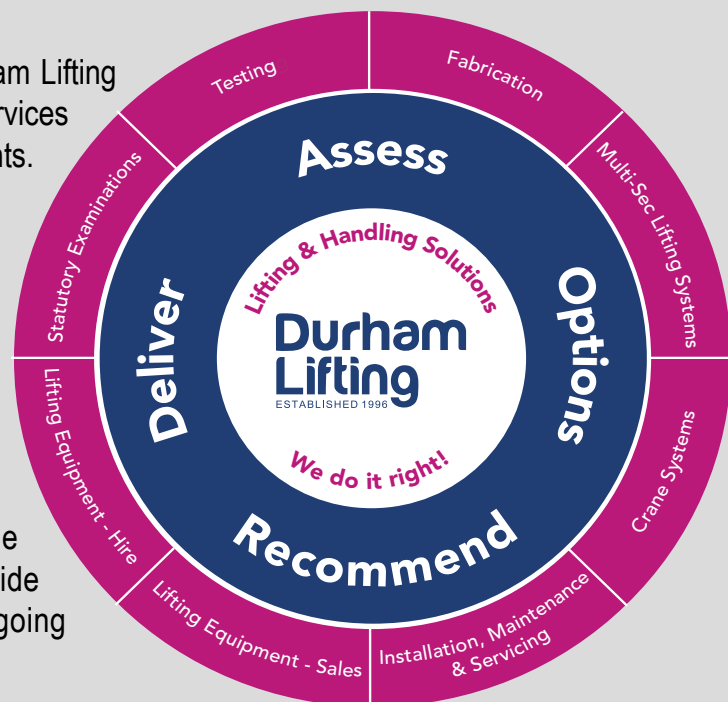

At Durham Lifting we understand that productivity, safety and reliability is what creates sustainable value and helps businesses remain competitive. Our core values are at the heart of everything we do and our mission statement “**We do it right**” ensures that our clients are dealing with an organisation they can trust to supply the right product, to the right standard at the right price.

HOW?

By implementing a four-step process Durham Lifting can be confident that the products and services offered fully meet with our clients' requirements.

- 1 **Assess** your needs
- 2 Investigate suitable **Options**
- 3 Make a technical **Recommendation**
- 4 **Deliver** the solution

With over 150 years combined experience our highly skilled and knowledgeable sales, technical and operations teams are available at every stage of the process to provide information, technical guidance and ongoing after -sale support.

WHAT WE DO >>>

FABRICATION - our facility located in the North East of England has a dedicated team of qualified tradespeople to produce quality assured fabrications to the highest standard across Oil & Gas, Offshore Wind, Subsea, Marine, Chemical and Decommissioning Industries.

MULTI-SEC LIFTING SYSTEMS – with over 25 years' experience in the manufacture and design of bespoke lifting and handling equipment tailored to your specific application, we are on hand to deliver cost effective and practical solutions to your engineering problems. designed and manufactured in the UK, the range includes modular spreader beams, modular lifting frames, lifting beams, adjustable module lifting frames, lifting and spreader frames, as well an array of other lifting equipment.

Founded in 1996,
Durham Lifting
provide a total
lifting equipment
solution for our
clients. Through
our continued
high standards
of quality and
customer service
Durham Lifting
hold ISO 9001:2015
certification through
Lloyds Register.

LIGHT CRANE SYSTEMS – including overhead gantry cranes, portable A Frames and jib cranes, all systems are designed and manufactured to suit your specific lifting operation – heavy or light duty, indoor or outdoor use, low headroom or speed of operation

INSTALLATION, MAINTENANCE & SERVICING – our service engineers have extensive experience of all makes and models of crane and hoist, and carry out a range of services, maintenance, installation and repair to a wide variety of lifting equipment. Our aim is to achieve maximum performance at all times; while extending lifespan, increasing safety and reducing your long-term maintenance and repair costs

LIFTING EQUIPMENT – we stock a full range of lifting products, load restraint and height safety equipment, available for immediate dispatch. Having established a strong supply chain all products are sourced from market leaders and we are committed to supplying quality equipment at competitive rates.

HIRE – we carry an extensive range of the highest quality lifting and handling equipment. Utilising our existing hire fleet within your rigging design assures that equipment is readily available and results in substantial costs savings to the client. The range includes Multi-Sec spreader beams up to 1500 Tonnes.

STATUTORY EXAMINATIONS – our qualified engineers can undertake thorough examination on all types of cranes, plant and lifting equipment. All examinations are carried out in accordance with current standards and are fully compliant with LOLER & PUWER. All certification is held within our online portal available to the client 24 hours a day

TESTING – we proof load test or test to destruction a variety of lifting equipment, structures, components, parts and products. From items designed to support a load of a few kilos to larger equipment designed to take thousands of tonnes. Testing can be carried out either in-house at our Britannia Testhouse facility, where we can test components up to 2000 Tonnes; or on site using live weights, water bags or hydraulic systems.
