What we do . . .

Fabrication

Our facility located in the North East of England has a dedicated team of qualified tradespeople to produce quality assured fabrications to the highest standards.

Multi-Sec Lifting Systems

Designed and manufactured in the UK, the range includes modular spreader beams, lifting frames, lifting beams, adjustable module lifting frames, lifting and spreader frames and container lifting and spreader frames.

Crane Systems

Including overhead travelling cranes, light crane systems, goliath cranes, portable a-frames, jib cranes and monorails. All systems are designed and manufactured to suit your specific lifting operation.

Crane and Hoist - Service

Durham Lifting have extensive experience of all makes and models of cranes and hoists. We carry out a range of services, maintenance, installation and repair to a wide variety of lifting equipment. We also provide a 24/7 breakdown service.

Lifting Equipment Sale

We stock a full range of lifting products, load restraint and height safety equipment, all available for immediate dispatch. Committed to supplying only quality equipment, and having established strong relationships with our suppliers, ensures that all products are sourced from market leaders, at competitive rates.

Lifting Equipment Hire

We carry an extensive range of the highest quality lifting and handling equipment and have worked hard to ensure that our hire fleet can meet your demands. Utilising our existing hire fleet within your rigging design assures that equipment is readily available from stock, resulting in substantial cost savings to you.

Lifting Equipment - Service

Experienced technicians can service and repair your lifting equipment either on site, off site, or at our workshops. Upon inspection, technicians will advise the best course of action, whether a repair or replacement is needed and then provide you with a cost estimate before proceeding.

Statutory Examinations

Our qualified engineers can undertake thorough examination on any type of crane, plant and lifting equipment. All examinations are carried out in accordance with current standards and are fully compliant with LOLER & PUWER. Certification is held within our online portal available to the client 24 hours a day.

Testing

We proof load test or test to destruction a variety of lifting equipment, structures, components, parts and products. Testing can be carried out at our Brittanica Testhouse facility, where we can test components up to 2000 Tonnes in our Avery H2 Test Machine. Tests exceeding this capacity can be completed utilising other methods. Our engineers also test components or systems at a location of your choice using live weights, water bags or hydraulic systems.
